Patent and Trademark Office
Docket No. 80743-8143

Notice of Inquiry

Agency: Patent and Trademark Office, Department of Commerce

Action: Notice of Inquiry and Request for Comments

Summary: The Patent and Trademark Office solicits written comments concerning the applicability of the Trademark Act of 1946, and in particular section 43(a) of the Act, to new technologies for the alteration of existing motion pictures, including colorization, time compression, and panning and scanning.

Date: Written comments should be submitted to the Patent and Trademark Office by Sept. 23, 1988.

Address: Comments should be sent to: Commissioner of Patents and Trademarks, Box 4, Washington, D.C. 20231.

For Further Information Contact: Richard Owens, Office of Legislation and International Affairs, U.S. Patent and Trademark Office, Box 4, Washington, D.C. 20231. Telephone: (703)557-3065.

Supplementary Information: The Subcommittee on Courts, Civil Liberties and the Administration of Justice of the House Committee on the Judiciary has asked the Patent and Trademark Office to study the extent to which the Trademark Act of 1946 (Lanham Act), 15 U.S.C. 1051 *et seq.*, may be utilized to address potential problems relating to the use of new technologies for the alteration of existing motion pictures, including colorization, time compression, and panning and scanning. In particular, the Subcommittee has asked the Patent and Trademark Office to examine the applicability of section 43(a) of the Lanham Act, 15 U.S.C. 1125(a), to such technologies.

The Subcommittee has asked the U.S. Copyright Office to prepare a related, more comprehensive study. In a Request for Information published at 53 FR 18937 (May 25, 1988), the Copyright Office announced that it would conduct an inquiry concerning the nature, extent and effect of the new technologies on the creators and users of audiovisual works, including motion pictures and television programming. The Copyright Office stated that it will also examine the impact of the new technologies on the integrity of our national film heritage and the creative freedom of filmmakers.

The scope of the Patent and Trademark Office's inquiry is narrower. The Office seeks specific, thorough comment on the extent to which the Lanham Act may be applied to address potential problems relating to the use of new technologies for the alteration of existing motion pictures. The Office solicits information on whether legal arguments have been or are likely to be made for the application of the Lanham Act, and particularly section 43(a), to such technologies. Discussion of relevant case law, including unreported cases, is requested. The Office also seeks comment on whether the Lanham Act should be amended to provide expanded protection against such alteration, and, if so, on the proper scope of such amendments. Recommendations for amending the Act should be precise and detailed.

Questions

(1) To what extent is it contemplated that the Lanham Act, 15 U.S.C. 1051 *et seq.*, and particularly section 43(a) of the Act, 15 U.S.C. 1125(a), may be used to address potential problems relating to the use of new technologies for the alteration of existing motion pictures, including but not limited to colorization, time compression, and panning and scanning?

(2) Should the Lanham Act be amended to provide more or different protection than is currently available? If so, what form should new legislation take? Who should be protected?

Copies of all comments received will be available for public inspection after Sept. 26, 1988, in Suite 902, Crystal Park Bldg. 2, 2121 Crystal Dr., Arlington, Va. 22202.

July 20, 1988.

DONALD J. QUIGG,
Assistant Secretary and Commissioner of Patents and Trademarks.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
